Palembang, South Sumatra, Indonesia

Informatics Engineering undergraduate with experience in software development through internship, technical projects, and organizational leadership. Skilled in building full-stack web and mobile applications using modern development technologies, with additional exposure to machine learning and computer vision. Interested in software engineering, backend development, and delivering scalable and user-oriented digital solutions.

Education

Sriwijaya University - Palembang, Indonesia

Sep 2023

Bachelor of Informatics Engineering, 3.98/4.00

- Completed a faculty-organized Python training covering Python fundamentals, NumPy, Pandas, and data processing concepts.
- Awarded a Bronze Medal in the Sriwijaya Sport Olympic Rector Cup UNSRI 2023 for the Mobile Legends E-Sports Competition.

Work Experience

National Land Agency (BPN) Palembang - Palembang, Indonesia

Dec 2025 – Jan 2026

Operational & IT Support Intern (Dispute Division)

Government institution responsible for land administration and public land services.

- Developed a full-stack Public Complaint Monitoring System using React.js, Express.js, and MySQL featuring a public tracking portal and admin dashboard to enable remote complaint status tracking and support complaint workflow validation using 600+ historical records during system testing.
- Supported digitalization initiatives by configuring office computers, synchronizing organizational cloud storage accounts, and assisting internal technical setup and troubleshooting.
- Evaluated existing complaint handling workflows and translated operational requirements into a practical digital solution.
- Assisted daily operational activities including official correspondence preparation, document archiving, spreadsheet-based record management, and reporting processes

Projects

Public Complaint Monitoring System

Dec 2025 - Jan 2026

Full Stack Web Developer

- Developed a web-based complaint monitoring system to enable citizens to track complaint and dispute statuses remotely using unique tracking codes.
- Designed and implemented responsive interfaces across 2 application modules (public portal and admin dashboard) to improve accessibility and complaint monitoring workflows.
- Built REST APIs and integrated MySQL database operations to support complaint tracking, spreadsheet-based data import, and status management workflows.
- Reduced dependency on manual in-office monitoring processes and improved service accessibility.

Official BEM KM FASILKOM UNSRI Website

Sep 2025 - Nov 2025

Technical Lead & Full Stack Developer

- Led the redevelopment of the official BEM website as the Person in Charge (PIC), overseeing planning, technical implementation, and development coordination.
- Developed full-stack features using React.js and Express.js including organizational information pages and the Ilkom News module for publishing faculty-related updates.
- Improved website usability and responsiveness to support digital communication and information delivery.

IndoCurrency — Personal Finance Mobile Application

Oct 2025 - Dec 2025

Mobile Developer

- Developed a mobile application using React Native for managing personal financial activities and transaction records.
- Implemented features including account management, transaction history, financial reports, and expense tracking.
- Designed responsive interfaces to improve usability and support financial monitoring.

Real-Time Pose Detection System Using YOLO

May 2026

Computer Vision Developer

- Developed a real-time pose detection (stand, sit, squat, lie down) system using computer vision techniques and YOLO-based models.
- Implemented pose classification and visualization to analyze body movement patterns.
- Optimized processing workflows for interactive and real-time usage.

Organizational Experience

BEM KM FASILKOM UNSRI - Palembang, Indonesia	Dec 2024 - Dec 2025
<i>Information Technology Development Staff</i>	
• Led the redevelopment of the official BEM KM FASILKOM UNSRI website as the Person in Charge (PIC), coordinating development activities and implementing full-stack features, including the Ilkom News module to improve information delivery and user experience. • Contributed as a Backend Developer for the SINERGI FEST event website by developing authentication features, participant registration workflows, and APIs while monitoring system performance during event registration periods. • Selected as a committee member for Jembara Desa, delivering educational sessions to local communities regarding artificial intelligence and recent technology developments to improve digital awareness and technology literacy. • Served as Equipment Coordinator during the Bukber × Makrab event by managing operational logistics and coordinating cross-division event preparation.	

Skills

- **Technical Skills:** JavaScript, Python, PHP, Java, React.js, Express.js, Node.js, React Native, Laravel, CodeIgniter, MySQL, REST API, Machine Learning, Computer Vision, CNN, U-Net, YOLO, NumPy, Pandas
- **Soft Skills:** Analytical Thinking, Problem Solving, Team Collaboration, Communication, Project Management, Adaptability
- **Software:** Visual Studio Code, Git, GitHub, Postman, Figma, Kaggle, Google Colab, Canva, Android Studio, AnyDesk, Microsoft Office
